Industrial Scientific Introduces New Ventis™ Slide-on Pump

The Ventis Slide-on Pump allows workers to use one gas detector for multiple applications.

PITTSBURGH, PA – 4 April 2017 – Industrial Scientific, the global leader in gas detection, is pleased to introduce a new version of the Ventis™ Slide-on Pump. The new pump is compatible with both Ventis™ MX4 and Ventis™ Pro Series Multi-Gas Monitors and is ideal for workers who typically wear their gas monitors for personal protection but occasionally require a pump for confined space entries or remote sampling applications. The Ventis Slide-on Pump reduces the need for workers to carry two or more gas detection instruments at one time.

Additional benefits of the Ventis Slide-on Pump include:

• Convenient sampling – Draw air samples from up to 50 feet away
• Easy set up – No tools are required to attach or remove the pump from the monitor
• Interchangeable batteries – Monitors and pumps use the same type of battery packs and chargers making them easy to exchange

“The Ventis Slide-on Pump gives workers more flexibility in the field,” said Josh Futrell, senior product manager, instrumentation. “Making it compatible with the Ventis Pro, one of the most versatile, user-friendly instruments available, is a great step toward keeping workers focused on the job at hand rather than managing excess safety equipment.”
