**SECTION 1: Identification**

**1.1. Identification**
- **Product form**: Mixture
- **Formula**: Non-flammable, Non-oxidizing gas mixture containing one or more of the following components: Nitric Oxide, Nitrogen Dioxide, Carbon Dioxide, Pentane, Oxygen, Nitrogen.

**1.2. Relevant identified uses of the substance or mixture and uses advised against**
- **Use of the substance/mixture**: Calibration / Reference
- **Use of the substance/mixture**: Industrial use

**1.3. Details of the supplier of the safety data sheet**
- **Industrial Scientific Corporation (AU)**
- **Imported By**: Scientific Gas Australia Pty Ltd.
- **Unit 3, 1 Perry Road**
- **Matraville NSW, 2036 - Australia**
- **T PH 1300 880 531**

**1.4. Emergency telephone number**
- **Emergency number**: Emergency Phone: International call (outside USA): +1 813 248 0585; Emergency Phone: International call (outside USA): +1 813 248 058; Australian Fire Brigade: 000; Australian Poison Information Centre: 13 11 26
- **CHEMTREC**: USA 1-800-424-9300, International 001-703-527-3887 (Collect calls accepted, contract 17729)

**SECTION 2: Hazard(s) identification**

**2.1. Classification of the substance or mixture**
- **GHS-US classification**
  - Compressed gas: H280 - CONTAINS GAS UNDER PRESSURE; MAY EXPLODE IF HEATED
- **Full text of H-statements**: see section 16

**2.2. Label elements**
- **GHS-US labelling**
- **Hazard pictograms (GHS-US)**

**2.3. Other hazards**
- **Signal word (GHS-US)**: WARNING
- **Hazard statements (GHS-US)**: H280 - CONTAINS GAS UNDER PRESSURE; MAY EXPLODE IF HEATED
- **Precautionary statements (GHS-US)**: P403 - Use and store only outdoors or in a well-ventilated place.
- CGA-PG02 - Protect from sunlight when ambient temperature exceeds 52°C (125°F).
- CGA-PG12 - Do not open valve until connected to equipment prepared for use.
- CGA-PG10 - Use only with equipment rated for cylinder pressure.
- CGA-PG21 - Open valve slowly.
- CGA-PG06 - Close valve after each use and when empty.
- CGA-PG05 - Use a back flow preventive device in the piping.
- CGA-PG11 - Never put cylinders into unventilated areas of passenger vehicles.
- CGA-PG27 - Read and follow the Safety Data Sheet (SDS) before use.

**2.4. Unknown acute toxicity (GHS US)**
- **Not applicable**

SECTION 4: First aid measures

4.1. Description of first aid measures
First-aid measures after inhalation: Immediately remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, qualified personnel may give oxygen. Call a physician.
First-aid measures after skin contact: Adverse effects not expected from this product.
First-aid measures after eye contact: Immediately flush eyes thoroughly with water for at least 15 minutes. Hold the eyelids open and away from the eyeballs to ensure that all surfaces are flushed thoroughly. Contact an ophthalmologist immediately.
First-aid measures after ingestion: Ingestion is not considered a potential route of exposure.

4.2. Most important symptoms and effects, both acute and delayed
No additional information available

4.3. Indication of any immediate medical attention and special treatment needed
None.

SECTION 5: Firefighting measures

5.1. Extinguishing media
Suitable extinguishing media: Use extinguishing media appropriate for surrounding fire.

5.2. Special hazards arising from the substance or mixture
Reactivity: No reactivity hazard other than the effects described in sub-sections below.

5.3. Advice for firefighters
Firefighting instructions: Evacuate all personnel from the danger area. Use self-contained breathing apparatus (SCBA) and protective clothing. Immediately cool containers with water from maximum distance. Stop flow of gas if safe to do so, while continuing cooling water spray. Remove ignition sources if safe to do so. Remove containers from area of fire if safe to do so. On-site fire brigades must comply with OSHA 29 CFR 1910.156 and applicable standards under 29 CFR 1910 Subpart L—Fire Protection.
Special protective equipment for fire fighters: Standard protective clothing and equipment (Self Contained Breathing Apparatus) for fire fighters.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

6.1.1. For non-emergency personnel
No additional information available

6.1.2. For emergency responders
No additional information available

6.2. Environmental precautions
Prevent waste from contaminating the surrounding environment. Prevent soil and water pollution. Dispose of contents/container in accordance with local/regional/national/international regulations. Contact supplier for any special requirements.

6.3. Methods and material for containment and cleaning up
No additional information available
6.4. Reference to other sections
See also sections 8 and 13.

SECTION 7: Handling and storage

7.1. Precautions for safe handling
Precautions for safe handling: Wear leather safety gloves and safety shoes when handling cylinders. Protect cylinders from physical damage; do not drag, roll, slide or drop. While moving cylinder, always keep in place removable valve cover. Never attempt to lift a cylinder by its cap; the cap is intended solely to protect the valve. When moving cylinders, even for short distances, use a cart (trolley, hand truck, etc.) designed to transport cylinders. Never insert an object (e.g., wrench, screwdriver, pry bar) into cap openings; doing so may damage the valve and cause a leak. Use an adjustable strap wrench to remove over-tight or rusted caps. Slowly open the valve. If the valve is hard to open, discontinue use and contact your supplier. Close the container valve after each use; keep closed even when empty. Never apply flame or localized heat directly to any part of the container. High temperatures may damage the container and could cause the pressure relief device to fail prematurely, venting the container contents. For other precautions in using this product, see section 16.

7.2. Conditions for safe storage, including any incompatibilities
Storage conditions: Store in a cool, well-ventilated place. Store and use with adequate ventilation. Store only where temperature will not exceed 125°F (52°C). Firmly secure containers upright to keep them from falling or being knocked over. Install valve protection cap, if provided, firmly in place by hand. Store full and empty containers separately. Use a first-in, first-out inventory system to prevent storing full containers for long periods. OTHER PRECAUTIONS FOR HANDLING, STORAGE, AND USE: When handling product under pressure, use piping and equipment adequately designed to withstand the pressures to be encountered. Never work on a pressurized system. Use a back flow preventive device in the piping. Gases can cause rapid suffocation because of oxygen deficiency; store and use with adequate ventilation. If a leak occurs, close the container valve and blow down the system in a safe and environmentally correct manner in compliance with all international, federal/national, state/provincial, and local laws; then repair the leak. Never place a container where it may become part of an electrical circuit.

Eye protection  
Wear safety glasses when handling cylinders; vapor-proof goggles and a face shield during cylinder changeout or whenever contact with product is possible. Select eye protection in accordance with OSHA 29 CFR 1910.133.

Skin and body protection  
Wear metatarsal shoes and work gloves for cylinder handling, and protective clothing where needed. Wear appropriate chemical gloves during cylinder changeout or wherever contact with product is possible. Select eye protection in accordance with OSHA 29 CFR 1910.133, 1910.136, and 1910.138.

Respiratory protection  
When workplace conditions warrant respirator use, follow a respiratory protection program that meets OSHA 29 CFR 1910.134, ANSI Z88.2, or MSHA 30 CFR 72.710 (where applicable). Use an air-supplied or air-purifying cartridge if the action level is exceeded. Ensure that the respirator has the appropriate protection factor for the exposure level. If cartridge type respirators are used, the cartridge must be appropriate for the chemical exposure (e.g., an organic vapor cartridge). For emergencies or instances with unknown exposure levels, use a self-contained breathing apparatus (SCBA). Self contained breathing apparatus (SCBA) or positive pressure airline with mask are to be used in oxygen-deficient atmospheres.

Thermal hazard protection  
Wear cold insulating gloves when transferring or breaking transfer connections.

Special transport precautions: Avoid transport on vehicles where the load space is not separated from the driver's compartment. Ensure vehicle driver is aware of the potential hazards of the load and knows what to do in the event of an accident or an emergency. Before transporting product containers:
- Ensure there is adequate ventilation.
- Ensure that containers are firmly secured.
- Ensure cylinder valve is closed and not leaking.
- Ensure valve outlet cap nut or plug (where provided) is correctly fitted.
- Ensure valve protection device (where provided) is correctly fitted.
