Substitution of GasBadge® Pro HCN Sensors

HCN sensors for GasBadge Pro instruments manufactured after April 8, 2016 (part number 17124938-B) will demonstrate response times as follows:

T50: 25 seconds
T90: 77 seconds

These times represent a deviation from the sensor specifications that Industrial Scientific typically manufactures for the GasBadge Pro. As a result, calibration times may be longer for GasBadge Pro instruments containing the specified HCN sensor.

For additional information, contact your local Industrial Scientific representative. Global contact information can be found at www.indsci.com/offices.

Sincerely,

Michelle Hammons
Associate Product Manager, Instrumentation
