PART NUMBER: 17130360  
REVISION: 1.0  
RELEASE DATE: May 1, 2006  
© 2006 Industrial Scientific. All rights reserved.

**ACTIVATION / DEACTIVATION**

- **Hold Power Key** for 1 second to activate.
- **Hold Power Key** for 5 seconds to deactivate.

**GAS READING MODE**

- **Gas Reading Mode**
  - **Hold Power Key** for 5 seconds to deactivate.
  - **Start Zeroing and Calibration Process**
  - **Display Peaks Mode**
  - **View TWA Mode**
  - **View STEL Mode**

**SECURITY**

- **Check Security Code** then go to Configuration Mode.
- **Enter Key** to select next digit.
- **Go to Gas Reading Main Display**

**NOTE:** This reference sheet is a supplement to the M40 Instruction Manual (part number 1710-8879) and is not intended to be used as a replacement for the information in the manual.

**IMPORTANT:** Industrial Scientific Corporation recommends that a functional ("bump") test be performed on every instrument prior to each day's use. A functional test is defined as a brief exposure of the monitor to a concentration of gas(es) in excess of the lowest alarm set-point for each sensor for the purpose of verifying sensor and alarm operation and is not intended to be a measure of the accuracy of the instrument. If an instrument fails to operate properly following any functional "bump" test, full instrument calibration should be performed prior to use. If conditions do not permit daily testing, bump tests may be done less frequently based on instrument use, exposure to gas, and environmental conditions. The frequency of testing is best determined by company policy or local regulatory agencies.

Industrial Scientific further recommends that full instrument calibration be performed using a certified concentration(s) of Industrial Scientific calibration gas(es) monthly to ensure accuracy.
