Industrial Scientific launches New Data Environment for iNet® Control v7.0

iNet Control v7.0 makes data about people, hazards, and equipment easier to use and access.

PITTSBURGH, PA – 29 August 2016 – Industrial Scientific, the global leader in gas detection, is pleased to introduce a new data environment for iNet Control users. iNet Control is the first hosted software for managing gas detector fleets. It improves safety by presenting data more effectively to help manage people, hazards, and equipment. Compatible with desktop or handheld electronic devices, the new user interface includes better spacing, intuitive graphics, and sleek colors and fonts, making it simple to review, report, and analyze data. Data management upgrades improve response times and enhance data security and privacy.

“iNet Control provides unmatched visibility into the maintenance, usage, and alarm data from your gas detection equipment. With version 7.0, we’re wrapping all of the great functionality in a fresh new user interface that adapts to any screen size, making it easier to use than ever before,” said Robb Gilmore, global director, software development.

Current users of iNet Control will see the update automatically the next time they log into the software. An informational webinar about the new data environment will be held on August 30, 2016. Visit here to register for webinar http://tinyurl.com/zj7o6ho.

About Industrial Scientific Corporation
As the global leader in gas detection, Industrial Scientific provides gas detection products and services that keep workers safe in hazardous environments. The company’s 700 employees in 21 countries are committed to preserving human life, and have dedicated their careers to ending death on the job in this century. Established in 1985 and headquartered in Pittsburgh (USA), Industrial Scientific also has operations based in Arras (France) and Shanghai (China), and provides technical services to customers from local service centers around the world. Industrial Scientific is the parent company to Predictive Solutions Corporation (www.predictivesolutions.com). For more information, visit www.indsci.com.
