New 6 Foot (1.8m) iGas™ Cable with Improved iGas Reader
Now Available

Industrial Scientific is pleased to announce the availability of a 6’ (1.8m) iGas cable for the DSX™ family of docking stations. This longer cable is ideal for customers needing to remotely store their calibration gas cylinders at a greater distance than the standard 3’ cable provides. The 6’ (1.8m) iGas cable comes standard with an improved iGas card reader that includes a built-in bracket. The bracket secures the iGas cable into the reader to prevent inadvertent disconnections.

This longer cable is compatible with the entire DSX family of docking stations only. It is not compatible with the DS2 or iNet DS. Please see below for part number and pricing information.
