

## NEWS RELEASE

### Industrial Scientific Acquires SAFER® Systems, Leader in Real-Time Plume Monitoring

*SAFER Systems brings the industry's only real-time plume monitoring, modeling, and mitigation capabilities to Industrial Scientific*

**PITTSBURGH, PA – 8 JULY 2019** – [Industrial Scientific](http://www.indsci.com), a global leader in connected sensing technology is pleased to announce that it has signed and closed on a definitive agreement to acquire [SAFER® Systems](http://www.safersystems.com), headquartered in Westlake Village, California.

SAFER Systems is a global leader in real-time plume modeling and mitigation solutions for the chemical, oil & gas, and transportation industries. Their next-generation, cloud-based platform integrates gas and meteorological sensor data in real time to provide organizations with the intelligence needed to confidently prepare for, and respond to, incidents. SAFER Systems serves customers in 23 countries.

The acquisition adds SAFER Systems' capabilities in hazard analysis and risk assessment to Industrial Scientific's core functionality in connected sensing and predictive analytics to deliver impactful solutions across customers and industries.

"Industrial Scientific is making significant investments to provide customers with a more holistic and real-time view of their safety programs," said Raghu Arunachalam, SVP and general manager of digital solutions at Industrial Scientific. "We are excited by the opportunity to integrate SAFER Systems' real-time modeling tools with our iNet® platform to enable customers to rapidly respond to incidents."

"This transaction is the critical next step toward offering customers solutions that simplify, automate, and integrate existing safety systems to save lives and protect communities," said Eric Fishman, president of SAFER Systems. "It allows us to draw on the strength and reach of Industrial Scientific to deliver real-time solutions as-a-service."

#### ABOUT INDUSTRIAL SCIENTIFIC CORPORATION

As a global leader in connected sensing technology, Industrial Scientific provides gas detection products, services and software to keep workers safe in hazardous environments. To date, the company supports 3,000 iNet® customers and monitors 350,000 devices across 13,000 sites. Established in 1985, and headquartered in Pittsburgh, Pennsylvania, Industrial Scientific has more than 1,200 global employees across 21 countries committed to preserving human life and eliminating death on the job by the year 2050. Industrial Scientific is also the parent company to Predictive Solutions Corporation ([www.predictivesolutions.com](http://www.predictivesolutions.com)).
