Support Ending for DS2 Docking Stations

Effective October 1, 2019, Industrial Scientific will end support for DS2 Docking Stations. Data from DS2 Docking Stations will stop uploading to iNet® Control, firmware support will end, and repair parts will no longer be available. Customers who have DS2 Docking Stations are encouraged to upgrade to DSX™ Docking Stations and take advantage of a special trade-in program through October 1, 2019.

DS2 Trade-In Program

- **iNet Customers:** iNet customers can upgrade from a DS2 to a DSX-L or DSXi Docking Station free of charge when signing a new four-year iNet agreement. For details, please contact your local Industrial Scientific sales representative.
- **Non-iNet Customers:** All non-iNet DS2 customers are eligible for a trade-in credit when purchasing a DSX-L or DSXi Docking Station.

Trade-In	USD	EUR	GBP	CNY
DS2 Docking Station	\$500.00	€430.00	£389.00	¥7,000.00

Why Upgrade to DSX Docking Stations?

DSX Docking Stations were introduced in June 2015 and revolutionized gas detection maintenance with an all-in-one maintenance, record storage, and fleet-management solution that flexes with the needs of your business. The benefits of DSX Docking Stations include:

- Faster bump and calibration times, resulting in decreased calibration gas use.
- Six-port intake option eliminates the need to cluster multiple docking stations.
- Improved diagnostics and intuitive troubleshooting save time and money.
- Options that align with corporate data security policies. Choose from one of three modes based on your company's needs:

DSXi Docking Station: A complete automated solution that uploads all records to Industrial Scientific's iNet Control software. iNet Control is free with the purchase of a DSXi and allows users to manage safety policies on gas detectors, people, and hazards from any mobile browser or web-enabled PC.

DSX-L Docking Station: DSX-L Docking Stations allow for local server storage of data behind a corporate firewall.

DSX Docking Station: A standalone docking station that works out-of-the-box and does not require a PC or network configuration. Data is stored on a USB drive.

For additional information about DSX Docking Stations, visit our website at <https://www.indsci.com/dsx> or contact your local Industrial Scientific representative. Global contact information can be found at <https://indsci.com/contact-us/>.

Sincerely,

Michelle Hammons
