Expanded Global Availability for Wi-fi Ventis® Pro5

Industrial Scientific is pleased to announce that the wi-fi battery option for the Ventis® Pro5 Personal Gas Monitor is available for countries outside the US and Canada. Wi-fi Ventis® Pro5 provides safety managers with a way to get real-time location data and alarm events from Ventis Pro gas detectors to cloud-based iNet® Now software using wi-fi infrastructure.

With iNet Now, supervisors gain instant visibility into their operations, regardless of location. Monitor teams, receive real-time alarm notifications, create compliance reports, and more from the intuitive user interface.

The new wi-fi battery will last 16 hours on a single charge and is compatible with existing chargers and DSX™ Docking Stations. Existing Ventis Pro5 customers can easily convert to wirelessly-connected wi-fi monitors by switching the battery. No need to buy a new instrument or additional gateways. For customers without existing Ventis Pro monitors, the wi-fi battery can be configured as part of any new detector. See the chart below for ordering information.

| Common Instrument Configurations | | | | |
|---|---|--------------------|--------------------|--------------------|
| Part Number | Description | Price (USD) | Price (EUR) | Price (GBP) |
| VP5-K123A101y1z | Ventis Pro5, LEL, CO, H2S, O2, Wi-Fi Li-ion, desktop charger, orange, LENS® | \$1,549 | €1,392 | £1,251 |
