External Dust Filters Discontinued for Tango® TX1 and Ventis® Pro Series

Effective March 4, 2019, Ventis® Pro Series and Tango® TX1 gas monitors will no longer include external dust filter part numbers 18109218, 18109435, and 17154540. This change applies to all newly manufactured Ventis Pro Series and Tango TX1 gas monitors, as well as monitors distributed through iNet® Exchange or Industrial Scientific Rental. Product performance is not affected by the removal of the external filters.

Customers who have existing Ventis Pro or Tango products in their fleets can continue to use the external dust filters. Please note, the external dust filters should **not** be used in applications where they may become wet as the instrument may not function properly when the filter becomes obstructed by water. **Always remove the external dust filters in situations where the filter may be exposed to rain, water, or other liquids.** The dust filters can be removed using a finger or needle-nose tweezers, as shown below. For additional information, please review the Product Manuals available at www.indsci.com/ventispro and www.indsci.com/tango.

External dust filters for Ventis Pro and Tango speakers continue to be available as an accessory. The external dust filter for the speakers can prevent dust or debris from settling into the opening. See below for the part number and pricing.

Part Number	Description	USD	EUR	GBP	AUD	CNY
18109613	Speaker dust barriers for Ventis Pro and Tango instruments (pack of 10)	\$15.00	€13.15	£11.37	\$20.89	¥101.22

For additional information regarding Ventis Pro and Tango, visit our website at www.indsci.com or contact your local Industrial Scientific representative. Global contact information can be found at www.indsci.com/offices.

Sincerely,

Michelle Hammons
Senior Product Manager, Instrumentation
