Peru	MTC	2186-2018-MTC/29

Orders for wirelessly configured equipment from Industrial Scientific will be disallowed if a wireless certification has not been obtained in the end user country. Wirelessly configured equipment must not be resold or shipped to countries where a wireless certification has not been obtained by Industrial Scientific. Failure to comply can result in monetary fines and associated penalties imposed by local regulatory authorities, which will be the sole responsibility of the entity that shipped or resold the equipment.
