

GAS DETECTION FOR SAFER FOOD & BEVERAGE OPERATIONS

RELIED ON BY LEADING FACILITIES, INDUSTRIAL SCIENTIFIC PROVIDES ACCURATE, DEPENDABLE PROTECTION ACROSS EVERY STAGE OF FOOD AND BEVERAGE PRODUCTION.

PRECISION SAFETY THAT KEEPS YOUR OPERATIONS FLOWING

At Industrial Scientific, we know precision and safety go hand in hand in the food and beverage industry. That's why we lead the gas detection space, delivering reliable, adaptable gas detection solutions that keep operations running smoothly and teams safe every shift.

FEATURED FOOD & BEVERAGE SOLUTIONS

MX6 IBRID®

Adaptable six-gas monitor
Hundreds of sensor combinations
Ideal for ClO₂ detection

VENTIS® PRO5

Rugged design for demanding conditions
Extended battery life up to 72 hours
Wide sensor compatibility

RADIUS® BZ1

Hands-free area monitoring
Long battery life for perimeter zones
Peer-to-peer communication capabilities

iNET®

Historical alarm data
Automatic monitor replacements and repairs
SAFER One® Dynamic Plume Modeling Software

CHLORINE DIOXIDE MONITORING MADE EASY

Skip the hassle of in-house calibration. With Industrial Scientific's exclusive program, your site receives freshly calibrated monitors equipped with ClO₂ sensors every 30 days—no expensive equipment required. Save time, reduce costs, and ensure accurate readings across your facility today.
